News To Issue Daily During The Fair.

Following the rule established last year the News will be issued daily during the week of the Bourbon Fair.

The fair daily last year was a decided success, upon which we received many compliments. This year we will endeavor to improve it to a degree and give our readers all of the happenings during the week.

It is requested that all advertisers get their copy in at the earliest possible date so as to facilitate its handling promptly and materially assist us in the work.

Fair Commences Next Tuesday.

One week from today the gates of the Bourbon Agricultural Society will be thrown open for the sixty-fifth annual exhibition. The historic fair promises to be larger and better than ever before. The wealth of premiums that have heretofore characterized each annual exhibition, are greater than ever before.

Everything in the way of a saddle and harness horses is provided for under a special arrangement, and the amount of money that can be won is secured, in no county fair in the State of Kentucky.

Not only are the attractive premiums attached to the horse class, but in every department, they abound in every profusion. There has been some real contests witnessed in the Bourbon fair show rings and each day of the fair this year will no doubt furnish a sensation.

Besides the many features of the show ring, there will be other attractions. The Society has closed a contract with the A. H. Jones Amusement and Concession Co., to furnish the attractions for the entire week. The company will come with a number of excellent midway attractions, which are intended to add to the pleasure of the crowds that are expected to attend.

Michael's celebrated concert band which last year furnished the music for the fair has again been contracted for and with this organization will come Miss Wilhelma Hamman, a soloist of great ability.

The musical program has always been a distinct part of the Bourbon Fair and those attending this year will find it for superior to any ever before heard in Paris.

Secretary Chas. Webber has been engaged the past week in putting on the finishing touches to the greatest county fair in the State. In his work he has had the co-operation of the directors and President Jas. M. Hall, together with the general public to make it the desired success.

Appointed To Military Academy.

Mr. Winn Lisle, son of Mr. D. C. Lisle, who resides in this county, has received an appointment to West Point Military Academy. The appointment was made by Hon. J. Campbell Cantrill, Congressman from the Seventh Kentucky District. Mr. Lisle is a graduate of the Paris High School and served in the highest office of the military department of that school.

Prompt Settlement.

Roxie Davis, agent for the Travelers' Insurance Co., made a record yesterday when he settled a claim with Miss Mamie Neal for damages done to her dress skirt, which was caused by a rim of Mr. S. G. Clay's automobile blowing off and tearing her dress. Mr. Davis settled with Miss Neal in seven minutes after the accident, replacing it with a new one. He also carried the policy on the car for Mr. Clay.

Amusement Features at Fair.

The amusement features at the Bourbon Fair, September 2-7 include a number of excellent attractions. All clean and wholesome, running day and night.

W. B. Ardery Purchases Paris Democrat.

By a deal which was consummated Saturday Mr. William B. Ardery, of this city, became the owner of the Paris Democrat, which for the past thirteen years has been edited and published by Mr. William Remington. Mr. Ardery will take charge of the paper September 2 and after moving to other quarters will improve the plant by the addition of new machinery and type.

Mr. Ardery, who is one of the promising young lawyers of the Bourbon bar, has been practicing his profession since his graduation from Central University about three years ago, and enters the newspaper field under the most favorable circumstances. He is the son of Mr. W. P. Ardery, prominent farmer of this county and is very popular.

Mr. Remington, who disposed of the plant, will assist Mr. Ardery in the business for a time when it is expected he will retire from the newspaper business after a service of almost forty years.

Dissolution.

The trusts have found out that nothing pays as well as "dissolution." Following a decree of the Supreme Court ordering the Standard Oil trust to dissolve, the value of that monopoly's stock went skyward. The court decree, without changing the trust in any way, except in the matter of administration, amounted practically to government guarantee to violate the laws, after the decree was issued the trust managers discovered that the monopoly stood in no further danger of government prosecution, and as this danger has always been the chief menace of the trust, it was a great boon to have it removed. Accordingly the value of the trust shares rose rapidly. As a result, other trusts have begun to "dissolve." The beef trust has announced a "dissolution" plan, so that it, too, may conform to the Supreme Court definition of a law-abiding trust. The powder trust did likewise, the decree in its case being written by the trust's own lawyers, and later approved by the Federal Court of Delaware. Next to a high tariff, "dissolution" is the best thing that ever happened to the trusts.

Work of Trusts.

In the city of Lawrence, Mass., where the highly protected woolen mills hold forth; where boys and girls work for \$2, \$3 and \$4 a week, and fathers and mothers work long hours for \$5, \$6 and \$7 a week for full time, 47 out of every 100 deaths are those of children under the age of 5 years. And of these 47 children, 35 under 1 year of age! The doctors declare the big majority of these children perish because their mothers labor such long hours, under such unsanitary conditions in the woolen mills.

But mark the percentage of child death in Lawrence particularly: forty-seven out of every 100 persons that die in Lawrence are children under 5 years of age. Now compare this with Seattle, Wash., There, out of every 100 persons who die, but 19 are children under 5 years of age.

The average of the whole country is 27 children under 5 years of age instead of 47 as in Lawrence, and for the whole country 19 out of every 100 deaths are of children under 1 year of age, instead of 35 as in Lawrence.

In Fall River, Mass., where the woolen trusts also operate, 50 out of every 100 persons that die, are children under 5 years. At New Bedford, Mass., another woolen mill town, 46 out of every 100 persons that die, are under 5 years, and the great majority of the 49 are babies.

The people who work in the woolen mills are "protected." That is the multi-millionaire woolen trust magnates who came to Washington for excessive protection, say that the sole reason they desire tariff rates which gives them a monopoly on American markets and permit them to charge double the value on woolen clothing, is that they are "protecting" their employees. In addition to making this plea, the trust magnates, of course, make liberal contributions of money to the campaign funds of the party of protection. The result is such bills as Schedule K of the Payne-Aldrich law.

Here is a plain question for the American people to ask themselves: Why should they longer permit a comparative handful, of millionaires to force them to pay exorbitant prices for every article of woolen clothing they wear, on the pretext of those rich men that they are "protecting" their employees, when these employees are not only being protected but are being paid such low wages that they are practically compelled to live like cattle?

Clean Campaign Fund.

The New York World says: "The check for \$1,000 which William J. Bryan sent to the Democratic National Committee is said to be the largest single contribution yet received. If this is true, even if at the end of the campaign it should be still true democracy might be proud of the record. A great deal of money is needed for the legitimate uses of a campaign, but it is clean money when it comes in sums of moderate sizes from many persons interested in the triumph of a political theory or principle. It is dirty money when it comes from an insurance company without knowledge or consent of its policy holders; or from a Harriman expecting to edit a president's message; or from the Morgan interests which are so friendly with us; from a corporation that is trying to buy privileges, or even from a harmless millionaire who merely seeks to make his country ridiculous as an ambassador abroad. No fear that the people will not support a people's campaign sufficiently for proper purposes. No greater and no other support is necessary."

Origin of Pawnbrokers' Sign.

On the doors of early Florentine bankers was the three-leaf lily sign, the lily being the emblem of Florence, and claim is now made that this is why the pawnbroker of today has the three balls as his sign, which appears to be an evolution of the three-leaf lily.

Meeting of Kentucky Jailers.

County Jailor W. T. Ballinger, of Lexington, is busily making preparations to entertain the members of the Kentucky Jailers' Association at its sixth annual meeting which will be held in that city on Tuesday, September 3. The meetings will be held at the courthouse and a large number of the 120 jailers of the State are expected to attend.

NATURE'S LAWS.

Nature's laws are perfect if only we obey them, but disease follows disobedience. Go straight to Nature for the cure, to the forest; there are mysteries there, some of which we can fathom for you. Take the bark of the Wild-cherry tree, with mandrake root, Oregon grape root, stone root, queen's root, bloodroot and golden seal root, make a scientific, glyceric extract of them, with just the right proportions, and you have

DOCTOR PIERCE'S GOLDEN MEDICAL DISCOVERY.

It took Dr. Pierce, with the assistance of two learned chemists and pharmacists, many months of hard work experimenting to perfect this vegetable alternative and tonic extract of the greatest efficiency.

C. W. PAWLEY, Esq.

Mrs. C. W. PAWLEY, of Millville, Calif., writes: "I wish to tell you that I have used your 'Golden Medical Discovery' in my family for twenty years. We have had a doctor called in but once during that time. I have a family of ten children, all well and hearty, for which, to a great extent, we owe thanks to you and your 'Golden Medical Discovery' and 'Pellets,' which we use when sick."

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.

CORTRIGHT METAL SHINGLES

Storm-proof, too, because they interlock and overlap in such a way that the finest driving snow or rain cannot lift them.
Best roof for country buildings, because they are safe from all the elements.
They'll last as long as the building, and never need repairs.

Be Happy!

Happy the girl, or woman, who has never suffered from any of the diseases of womanhood! Or, if she has been a sufferer, happy is she if she has learned of the wonderful benefits of Cardui, the woman's tonic!

Cardui is a gentle, tonic remedy, for women's ailments. It is a natural medicine—safe, harmless, purely vegetable. It has been in successful use for more than 50 years. It has cured thousands. It should do the same for you.

TAKE CARDUI The Woman's Tonic

Mrs. Mary Neely, of Denver, Tenn., says, "I think there is no tonic on earth, as good as Cardui. I used it with the very best results. I had backache and nearly everything a woman could suffer with, until I took Cardui. Now, I feel better than I have for two years. I shall always recommend Cardui to other suffering women. I can't praise it too highly. As a medicine for weak, tired, worn-out women, Cardui is safe and reliable. Try it, today.

Shocking Sounds

In the earth are sometimes heard before a terrible earthquake, that warn of the coming peril. Nature's warnings are kind. That dull pain or ache in the back warns you the kidneys need attention. If you would escape those dangerous maladies, Dr. J. C. B. Bitters at once and see backache fly and all your best feelings return. "My son received great benefit from their use for kidney and bladder trouble," writes Peter Bondy, South Rockwood, Mich. "It is certainly a great kidney medicine." Try it. 50 cents at Oberdier's.

Left Auntie Pondering.

Ernest is constantly asking his indulgent aunt for pennies, which are never refused. She recently said to him: "Now, Ernest, you may ask aunt for a penny whenever you want one, but you won't ask other people for one, will you?" "Oh, no," he answered with an air of letting his relatives off easy. "I will ask other people for a nickel."

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Optimist and Pessimist.

An optimist is a man who does not care what happens so long as it does not happen to him; a pessimist is a man who has lived for a long time with an optimist.

A vast amount of ill health is due to impaired indigestion. When the stomach fails to perform its functions properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. They will strengthen your digestion, invigorate your liver, and regulate your bowels, entirely doing away with that miserable feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by all dealers.

Made His Demands Definite.

The "minimum wage" idea appeals to one English boy who was asked the other day by his teacher to write, as the daily composition, a letter to his father asking for an increase in pocket money. The boy set forth the need of large funds, and ended with a courteous demand for a "minimum sum of money." One of the reasons for the demand was that the boy did not get enough taffy to eat and had no papers to read.

He Won't Limp Now.

No more limping for Tom Moore, of Cochran, Ga., "I had a bad sore on my instep that nothing seemed to help till I used 'Bucklen's Arnica Salve,'" he writes, "but this wonderful healer soon cured me." Heals old running sores, ulcers, boils, burns, cuts, bruises, eczema or piles. Try it. Only 25c at Oberdier's.

Her Household Gods.

Miss Oddways in receiving a friend in her new apartment the other day said cordially: "Well, here I am, you see, in my new home, with all my lasts and pennants gathered about me."

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes M. E. Gebhardt, Oriole, Pa. For sale by all dealers.

Origin of Fire Insurance.

Fire insurance is said to have originated after the great fire of London in 1666.

Mr. W. S. Gunsalus, a farmer living near Fleming, Pa., says he has used Chamberlain's Colic, Cholera and Diarrhoea Remedy in his family for fifteen years and that he has found it to be an excellent remedy, and takes pleasure in recommending it. For sale by all dealers.

Ruthless Destroyer of Books.

The most ancient destroyer of books known was the Babylonian king, Nebonassar, who in the third century, B. C., destroyed all the records of the reigns and rules precedent to himself.

"Were all medicines as meritorious as Chamberlain's Colic, Cholera and Diarrhoea Remedy the world would be much better off and the percentage of suffering greatly decreased," writes Lindsay Scott, of Temple, Ind. For sale by all dealers.

Embarrassing Hospitality.

The Ifugaos are very friendly, and are continually offering gifts of chicken and eggs. They have a very strong drink on the order of tapul, which they bring forth on all occasions, and the etiquette of the country requires that one should take a drink. The continued invitation to drink this "congcong" was the most disagreeable part of the trip through their country.—Manila Times.

BURIED TALENT HELD TO BLAME

Educated People Responsible for the Illiterate.

OPPORTUNITIES NOT REALIZED

In an Awakening Address Delivered by Harry A. Sommers, of the Elizabethtown News Before the Kentucky Educational Association, the People of the Commonwealth Were Forcibly Reminded of a Duty Long Neglected.

At a recent meeting of the Kentucky Educational association at Louisville, Harry A. Sommers of the Elizabethtown News charged that the educated people of the commonwealth are chiefly responsible for the uneducated and that Kentucky has been asleep for fifty years on the public school situation.

Mr. Sommers spoke in part as follows on the subject of "The Press and the Public School":

I charge that the educated of the commonwealth are chiefly responsible for the uneducated, that the learned are responsible for the illiterate. We have been given talent which we have

HARRY A. SOMMERS.

buried instead of using for our more unfortunate fellow man. We have marvelous opportunities, but we have not realized or accepted the responsibilities which go with the opportunity.

Kentucky, the first state in the South to establish free schools, has been asleep for nearly fifty years on public school education and now wakes to find herself lagging in the rear of most of her sister states in this important matter. We were asleep when we allowed our rural schools to retrograde. We were asleep when we did not keep the school apace with the development and growth of the nation. We were asleep when we left the whole matter in the hands of the school teacher and neglected our responsibility to assist him and stand by him. We were asleep when we sent men to the legislature unfit to grapple with this question and most generally indifferent to it.

Thank God we are awake now and before it is too late. Awake and on guard, and if we as sentinels for education on the watch towers of progress go to sleep until the school house is made a thing of credit instead of a thing of reproach, until the stain of illiteracy is wiped out, we deserve the fate of any sentinel who goes to sleep at his post. A man who does wrong and does not know he has violated the law is not exempt from the penalty, but the man who knowingly violates the law is more culpable. While we were ignorant and indifferent to the lack of advancement in our school's we were nevertheless responsible, but now that we are fully aware of our unfortunate condition we are doubly responsible if we do not respond to it.

The precious jewels of the commonwealth are its children. The future of the state depends upon them and they depend on us. Are we going to polish them with an education to fit them for life's duties and obligations and citizenship, or are we going to allow them to grow up in ignorance to become paupers and criminals? It is a burning question which appeals to manhood, which appeals to intelligence, which appeals to our hearts. Have we heard the cry which comes from the mountains and from the isolated sections all over Kentucky? I, for one, have heard it. It has been ringing in my ears for ten years or more and neither my pen nor voice shall become silent in answering it until every educated man and woman in the state realizes our needs and recognizes the responsibility. As the aged Hamalcar in his camp fires swore the infant Hannibal to eternal hatred for Rome, so I would swear you now by the intelligence which beams in your eyes, by the enthusiasm which runs in your veins and by the love which is in your hearts, to swear an eternal hatred for ignorance and illiteracy until we have wiped it from our borders.

What we need in Kentucky is public sentiment for the public schools,

for laws without public sentiment will not solve our problem. We need a public sentiment which will impress the fact that a greater obligation rests upon the parents to educate their children than upon the state, and that they ought to be willing to pay more for it than the state.

That the best way to create a local interest in the local school is a local tax and as proof of this, it should be shown that all the best schools have a local tax and all the worst schools are without it.

That the district trustee should be as much interested in the teacher and his teaching as the teacher is in his school. That the school house should be as good and as attractive as any home in the district.

That when we know under the new school census where the illiterate children live, it will become the duty of the people of that district to see that these children are sent to school and provide clothing and shoes if the parents are too poor to provide them.

That the teacher should be more commended for what he is able to accomplish and less criticized for what he is unable to do.

That moonlight schools for the adults will pay better than moonshine stills.

That the office of county school superintendent is the most important in the country.

That it is more important to educate all the people some, than a few of the people a great deal.

That we do not need to teach dead languages in a live country except within the walls of a university.

That those things which will be of most value to a boy and girl after they leave school should be the things which should be taught first and best.

That the children's minds should not be puzzled over Greek roots when they do not know the difference between calamus root and poke root.

That the conjugation of the verb "amo" need not be taught in the school because the boys and girls learn it soon enough outside the school.

That the unknown quantities of algebra had better remain unknown than that a boy should remain ignorant of the soil quantities of his father's farm.

That the time spent in making indifferent performances on the piano could be better utilized in abolishing bad biscuits from the breakfast table.

That the public school ought to get in the newspaper and the newspaper in the public school.

While you may not agree with me in all of these things, you will certainly agree with me in most of them. The question is how are we going to create this public sentiment.

The school teacher is powerless to do it even when he does his best. He is handicapped by the very nature of the case. We must look to the educated people of this state. Men and women who will give their time and talent and means to create a better sentiment for the rural schools, and we must look to the press.

The newspaper and the public schools are the two greatest forces at work in this country for both progress and enlightenment.

The newspapers' influence depends upon the number of readers it has and the number of readers depends on how many people are taught to read. There must be a combination between the press and the professor, a united interest between the newspaper and the public school. If the press of this state would give half the thought and half the space to education that it does to politics the schools would be revolutionized in less than a decade. The press must first be made interested in this great question, then it must be educated to the needs of the schools, then shown how the needs may be supplied. The editor and the school teacher must be brought within closer touch with each other. This should be done through this organization.

Mind you, I am not talking about a movement through the press for the benefit of the teachers, but a movement for the benefit of the people. The school must be made the important thing and not the school teacher. The children's interest must be put in the forefront as the battle cry through the press for their welfare, and the welfare of the state. All great enterprises get before the public with the news bureau and there is no enterprise as great as the education of the masses. Most enterprises pay for publicity, but this is one of which the newspapers will require no pay. It takes real newspaper talent to conduct any kind of publicity bureau. It requires the talent of first interesting the reader with what it tells, next it must do more than interest it. It should get the reader in sympathy with the story, then it must so take hold of him that he wants a part in it. There should be selected a most capable man or woman with proper newspaper instinct to send a column once a week to every newspaper in Kentucky of such live public school matter that the editor will be glad to give it space. The information should be gathered from the various schools all over the state by the teachers and sent to the head of their bureau. It should be facts and not arguments. The facts can be so written that they will carry their own argument and also carry convictions. Such an educational press bureau established in this city or Frankfort could and would arouse more interest and create more public sentiment for the rural schools than any other one thing could do, because every week it would have a thousand times as large an audience as this building will hold. With the press willing to help, I do hope that such an opportunity will not be allowed to escape.

KITES TO CARRY AIR SCOUTS

French Military Man Has Devised a Scheme Which Authorities View With Favor.

While the enthusiastic airmen have succeeded in putting France far ahead of all other countries in the way of military aeronautics, one captain, Saconney by name, has been doggedly working over man-carrying kites, of which so much has once expected, but which have been put in the shade by the more showily performing aeroplanes.

A short time ago he made an ascension out at sea, carried up by a series of kites that were towed by a man of war. He claims that it is a simple matter to make observations and that it is much easier to regain the ship than if he tried to come down from an excursion by aeroplane.

His latest adaptation, and one that has made military authorities take notice, is a combination of automobile and kite.

His outfit consists of an automobile with a windlass that is operated by the motor, a trailing truck carrying the kites folded up and a squad of 20 men. The train can attain a speed of about 16 miles an hour.

The speed of the motor to some extent makes up for lack of wind, and ascensions are safe where they would be dangerous under ordinary conditions. The big kites make reconnoitering easier than from an aeroplane, and the apparatus is much handier to put together.

LIKES OLD-FASHIONED HOUSE

Belgian Consul at Boston Refuses to Make Changes in His Picturesque Abode.

E. S. Mansfield, the Belgian consul, has an old-fashioned house which has existed for at least a hundred years, and which he has refused to have fitted either with gas or electricity.

It is like a breath of another century, says the friends who visit it, but they admire even more the rare and ancient garden which leads from it. In itself the garden is complete and after the style of the early European gardens or America's colonial ones. The old paintings which hang in the house always evoke the most praise of all. They are Spanish, Dutch, Flemish, Italian, French and English works, and they add to the aged aspect of the home.

Whenever guests who know the modern activity of Mr. Mansfield first become acquainted with his house, they are surprised that it should appear so opposite to the owner. They ask Mr. Mansfield of it and he answers: "I like the contrast."—Boston Traveler.

Pigeon Brought Luck.

It is one of the pet beliefs of the fishing fleet folk that when a white bird flies aboard a ship at sea good luck is bound to follow. And if a white bird happens to fly aboard a brand-new craft it insures the vessel with all kinds of joy forever. Out on Georges, recently, a little pigeon fluttered down on the deck of the good ship Mary, perching on the wheel box. Result, good luck. Although Captain Whalen's boat struck mighty hard weather it came through without a scratch and landed 130,000 pounds of fish, mostly hake and cusk, which is pretty nearly the record catch for a maiden trip. The pigeon looked as if it had had some pretty hard luck itself before it fell in with the Mary, however. One of its wings was badly torn, as if a gull or a hawk had taken a piece out of it. The men aboard took good care of the pigeon, giving it plenty of food, although they made no attempt to confine it to any one part of the vessel. The bird made friends with every one, especially the cook, and refused to eat except out of the men's hands. As the Mary came up the harbor the bird was deck. Abreast of Governor's island he suddenly took wing and flew away. The men said it looked to them as if the bird had recognized his surroundings in the inner harbor and had flown for home.

When Fish Go to Bed.

Did you know that fish go to bed in the winter? Prof. Dyche, state fish and game warden for Kansas, says: "Sure thing, fish have beds. I have seen them piled up four and five fish deep for a space at least 3 by 10 feet. Usually they find a place below a log or some kind of an obstruction in a stream where there is an eddy. They can maintain their positions there without much effort. I don't know whether they sleep or not, but fish will spend most of a winter in that way.

"When the water gets extremely cold the fish become sluggish. They can move around a little, but they lose all their alertness. They can even be caught by hand. All you need to do is to cut a hole in the ice after it has been frozen over for some time. Some fish will come to the hole for air. It is an easy matter to slip your hand under the fish slowly and you may lift him clear of the water before he makes a wiggle.

Good Excuse.

It was on the sleeping-car. "Say, mister," said the man in the upper berth to the occupant of the lower, "quit that music, will you? What do you think this is, a concert-hall? The rest of us want to sleep."

"Why, the car is so stuffy," said the warbler, "I was only humming a little air."

It was then that he was hit with a Pullman pillow, remaining unconscious for seven hours.—Harper's Weekly.

Franklin Poolers Threaten Suit.

Suit against the Burley Tobacco Society pool is threatened by Franklin county growers, who are dissatisfied with the last distribution of proceeds from the 1909 pool.

A conference of a number of the growers was held, and they decided to employ attorneys at once to file the proper suit to secure an accounting from the Burley Society officials.

A meeting of all the seven or eight hundred poolers of Franklin county has been called for Saturday, August 31, to raise funds to prosecute the suit.

Paris May Get Natural Gas.

The problem of having Paris supplied with natural gas has been under discussion for several months, and a letter relative to the subject was received Friday from Capt. John Tonkin, general manager of the Wayne county company.

It was stated in the letter that the company hoped to get the line piped to this city this fall, but unless it felt assured of completing the line in ample time to supply the consumers sufficiently, in justice to all parties it would not be attempted at this time.

If the line could not be completed before very cold weather sets in there might be a shortage which would disconcert the people with their first experience. However, Capt. Tonkin gave the assurance that if the attempt is not successful this fall the line will certainly be completed later.

Contract For North Middletown Church Let.

The contract for the new Christian church at North Middletown, this county, has been let to W. K. Hagan, of that place, who submitted the plans for the new structure, which when complete, will cost in the neighborhood of \$20,000.

It will be one of the most convenient and up-to-date buildings for a country church in the Blue Grass, and one which the community will be proud. It will be a brick veneered building, 93 by 100 feet, with concrete basement and sub-basement. The auditorium and gallery will seat about 600 people. There will be forty seats for the choir and organ space and baptistry.

The basement will have a bible school assembly room, eight class rooms, ladies' parlor, officer's room, pastors' study, toilet and dressing room. The building will have a lighting plant, water system and will be heated by two furnaces.

It will be erected near the center of the lot and will front on College street. There will be a driveway on each side of the building, both passing through a porte-cochere. The contract calls for the completion of the building July 1, 1913.

Strong Fight For Teddy to Be Made.

The Fayette County Progressive Committee met in Lexington Saturday, and organized for the campaign by electing L. A. Ruckno as chairman and B. F. Norfleet secretary and treasurer. Ex-Postmaster J. L. Earlywine, of Paris, was recommended for chairman of the Seventh District Congressional Committee, which will meet in Lexington Aug. 31 for organization.

Col. R. C. Morgan, ex-Confederate, and brother-in-law of Gen. Basil Duke, of Louisville, was endorsed as the Progressive candidate for Congress in opposition to Congressman J. Campbell Cantrill, and his name will be presented

at the meeting of the District Committee, next Saturday, for final consideration. Provisions were made for opening headquarters with the view of prosecuting an aggressive campaign for Roosevelt and Johnson in Lexington and Fayette county. Speeches endorsing the members of the committee were made by Henry T. Duncan, Col. Thomas L. Walker, former Republican County Chairman Charles H. Brerlyman and Revenue Agent M. P. Rehorn, and much enthusiasm was injected into the movement.

DR. DOLLE'S MESSAGE TO MEN
YOU CAN BE CURED BY

DR. C. L. DOLLE.

Why Take Treatment That Is Doing You No Good, When a Few Days under the care of Dr. Dolle Will Show You How Easy It Is to Cure These Diseases When the Proper Treatment Is Administered.

Have you treated for months and years, and been disappointed until you think that you cannot be cured? Not, no doubt, all this time have been treated by inexperienced doctors who had neither sufficient knowledge nor experience to know how to cure you.

These are the diseases of which I have cured so many, justly giving me the reputation for cures of which I am so proud.

Blood Diseases, Skin Diseases
I will give you treatment that will in a few days cure all rash, spots and every skin symptom. My treatment gets the poison out of the system instead of driving it in like ordinary treatments. I cure blood diseases and skin diseases so they cannot come back.

Varicose, causing aching or pain in groin or back, Nervousness, Weakness, Loss of Vitality, Lack of Ambition

My one-treatment cure is what you should have and what you will have to have to be cured right. Only one visit is required. I do no cutting and you suffer no pain or trouble. All signs disappear in a few days.

Nervous Troubles, Lost Vitality
My combined treatment for these troubles so common among those who have become weak and worn out, who have caused it by folly, dissipation and excesses, is remarkably good. No one believes how quickly it benefits until they have taken it. It cures weakness, nervousness, pain in back, lack of energy, ambition and strength—it's the treatment I have found so effective in treating such diseases.

Kidney and Bladder Troubles
are scientifically cured by me. My methods immediately benefit you, and the majority of cases I cure come from physicians and specialists who failed.

Piles, Fistulae—I can cure you so quickly and easily that you will be surprised. I will give you just the result and cure you are looking for without a surgical operation.

Acute Diseases—Itching, Burning, strong drug store remedies seldom cure. My treatment stops every symptom and cures in a few days. It is scientific—that's the only sure way to be cured so it will not come back.

You can take my Treatment without a cent and pay me when I cure you. I know that I can give you new life, new hope, and can restore you back to health and happiness. I know that every man will pay after I have eliminated every trace of disease from his system. Microscopic and analytical analysis FREE. I have written a book that ought to be in the hands of every suffering man in this country. I will send you a copy, free, if you will write me at once the disease for which you desire treatment. Hours, 9 to 4: Sunday, 10 to 1 p. m. Evenings, 7 to 8 on Monday, Wednesday and Saturday nights.

ALWAYS MASTER OF FINANCE

How John D. Rockefeller Established His Credit in the Early Days of His Career.

Just because John D. Rockefeller has made more money than he can count without the aid of nineteen clerks and forty adding machines, not to mention a well trained corps of coupon clippers, there are many people who come forward these days with stories to show that John, now famous for his wealth, wigs and wit, was once about the cutest person that ever happened when it came to financial strategy.

According to this latest narrative, Rockefeller told a close friend—and that "close" goes both ways—one morning that he wanted to borrow \$5,000 and that he must have it in order to save his business. The friend went down town in the course of his work, and pretty soon met a big banker.

"I wish," said the banker, "if you see Mr. Rockefeller this afternoon, you would tell him that I have found a place to put that \$10,000 which he asked me to loan out for him."

The friend gasped like a goldfish, and proceeded on his way, encountering another of the town's leading bankers.

"By the way," said the banker, "when you see Rockefeller this afternoon, please tell him that I have found a man who wants to borrow that \$10,000."

The friend staggered on, and met a third banker, who repeated what the other two captains of finance had said. Then he went back and found Rockefeller.

"John," he said, in astonishment, "when I left you this morning you told me you had to borrow \$5,000, and all day bankers have been telling me that you asked them to lend out \$10,000 for you."

"Well! well!" smiled Rockefeller, "that's fine! I suppose I may safely assume now that my credit is established in this town. I'll just step out and borrow that \$5,000 I need."—Popular Magazine.

OLD STRUCTURES IN DECAY

Condition of Famous Leaning Towers in Italy Excite Apprehension of Antiquarians.

Reports have been current for some time concerning the safety of the Leaning Tower of Pisa, and the Italian papers announce a similar state of things with the Garisenda of Bologna and the Ghirlandina of Modena. The former dates from 1110, and the latter from 1224 to 1319. The Tower of Pisa, which is about 177 feet in height, is 14 feet 6 inches beyond the perpendicular. It is accentuated from the base, but diminishes half way up and onward. The inclination is said to be greater today than it was in 1817. This has been marked in later years. But there are other disquieting signs. Some of the stonework of the windows is giving way, and the steps are said to be cracking. The soil upon which Pisa's Tower was raised, a Paris contemporary points out, is "permeable and friable," and subsoil water is believed to be penetrating beyond the masonry. Architects and other experts are now engaged in a close observation. They fear that below the foundations there are some considerable voids, and they are of opinion that the inclination of the tower has increased since 1859. The commission appointed to deal with the matter concludes that there is no immediate danger, yet there must be no delay in remedying matters. The Garisenda is about 161 feet in height, with an inclination of just 14 feet. The Ghirlandina is said to be the highest of the towers, being 331 feet. It is slightly inclined toward the Cathedral, which itself is in a feeble state.

When We Meet Our Kind.

"Attendants in European museums look to it that no American may escape meeting his compatriots," a traveler said. "At Mme. Tussard's wax works exhibition the custodian, let me wander around alone for an hour, puzzling helplessly over British royalty, but when I got in the neighborhood of Harry Thaw he woke up. How he discovered then that I was an American I do not know; I hadn't said anything. But I coughed, and perhaps that betrayed me. Anyhow, 'That's Harry Thaw,' said he."

"I thanked him and passed on. At my heels came the guide. He followed me to the staircase. 'Crippen's down stairs,' he said. Three steps further along he hailed me again. 'And Guiteau,' he announced."

"The trio of my fellow countrymen excited no thrill of patriotic pride, but the custodian had done his part."

Why We Have No Paris.

There can never be in the United States a real Paris of America until we shall get ranks and orders of nobility, and that will only be when our republic shall develop into a grand imperial nation. Under a newly acquired emperor a titled class would follow as a matter of course, and the easiest way to get it would be to sell the titles. Ten million dollars would buy a dukedom, \$5,000,000 the title of count, and \$1,000,000 that of baron. In the beginning of old world nobility titles were granted by the sovereign for eminent services, but when such a system is started in a great country like ours the simplest way would be to establish an aristocracy of wealth.

Until then our great metropolitan cities will never be more than mere centers of business and capital.—New Orleans Picayune.

"The Thirty and Nine;"
Or, Why Stop With One?

By JOHN B. M'FERRAN, Chairman Educational Committee,
Louisville Commercial Club.

II.

LOOKING at our educational problems from a business standpoint, we have been turning too much to what is called higher education. I am myself a believer in higher education. I mean by that the universities, colleges and high schools and would not detract from their importance in the least, but they are already liberally provided for far in advance of our common schools.

We are told by the United States bureau of education "that more than two-thirds of our boys in the United States leave school before the end of the eighth grade;" "that the average length of a boy's schooling is less than six years, and this school training before the ages of twelve to fourteen years, while the boy is too young to appreciate his loss;" "that less than one boy in four completes the grammar grades and but one boy in eight goes any further with his schooling;" "that only one boy in forty of those who enter the first year of high school completes the course in high school, public or private, or goes higher;" "that of all boys twelve to fourteen years of age who should certainly be in school less than 60 per cent are there."

From the Sage Foundation fund's reports we are told that of 100 boys who enter the first grade only fifty-five enter the fifth grade, only twenty-seven are left in the eighth grade, six in the high school and one to enter college; that only 5 per cent of the males in the nation are fitted by definite educational training for their occupations or vocations.

These facts are given on high authority, and when we remember that they apply to the country at large and that Kentucky is probably below this average, is it not lamentable? IF ONLY ONE BOY IN FORTY COMPLETES THE HIGH SCHOOL COURSE IS IT NOT VERY IMPORTANT FOR US TO GO MORE STRENUOUSLY AFTER THE OTHER "THIRTY AND NINE?"

I think at present we, educators and all, are following the old trend of looking too exclusively toward the higher education. I think our legislative bodies have illustrated this when four years ago they made it mandatory on every county in the state to build a high school within two years. There was little mandatory concerning the poor, small schools scattered throughout the counties. These "thirty and nine" poor devils will have little chance to get within sight of a high school at all, but must plod along as best they may.

It is true the same legislature allowed the fiscal court to levy a tax of 20 cents on the \$100 for school purposes in each county. It is also true that many of the counties levying this tax have used it largely in establishing a high school at the county seat or some other town, which is unfair to these "thirty and nine" who do not get to the high school.

I DO NOT WISH TO BE UNDERSTOOD AS OPPOSING HIGH SCHOOLS OR HIGHER EDUCATION—I AM IN FAVOR OF BOTH TO THE LIMIT—BUT I AM COMPLAINING THAT ONLY ONE BOY IN FORTY SHOULD HAVE THE LION'S SHARE OF THE FEAST INTENDED FOR ALL. I THINK THIS SHOWS CLEARLY THE NEED OF MORE MONEY FOR OUR SCHOOLS, SO THAT ALL MAY HAVE A FAIR SHOW.

There is, I think, another mistake that ought to be corrected as far as possible, and that relates to the pay of teachers by location or with reference to location. The cities and large towns and wealthier portions of the counties have the pick of the teachers because they pay higher salaries and the environment generally is more attractive. Thus the back districts in the counties (where there are generally more children) are compelled to get along with the cheapest and poorest teachers. These teachers, as a rule, have the minimum salaries. Now, I hold that these "thirty and nine" out in the back districts for good results need the best teachers or at least as good as the best.

This condition can be met at once by the county boards supplementing the salaries of teachers in the poor districts out of the county funds. Such action would bring immediate relief. WHY WAIT ONE YEAR OR TWO YEARS FOR LEGISLATIVE ACTION WHEN THERE IS A TEMPORARY WAY OUT OF THE DIFFICULTY PENDING IMPROVEMENT IN LEGISLATION? Think of the uplift given to the citizens of another generation even by a single term of schooling! Is it not little short of criminal to fail to apply a remedy when it is within our power?

If we cannot get funds enough for both high schools and "low" schools, is it not better to use sufficient of the county fund in this way than to put all or the bulk of it in a city or town high school which the "thirty and nine" can have but little hope to enter? Would not these "thirty and nine" by reason of their improved intelligence through these better teachers in time force the building of high schools for all?

ARMY STYLES NEW TO HER

Conscientious Laundress Meant Well, but Her First Efforts Utterly Failed to Please.

At the army post a new laundry had been installed and the management was specially anxious to please and advised that mending would be included in the work.

The major was equally willing to be pleased and sent, among other things, a suit of duck as a first installment. The army officer's washable coats have buttons, but these are not sewed on. Instead, small eyelets are worked in the coat and the shanks of the regulation buttons are pushed through these holes, being held in place by brass rings on the other side. Before being laundered these buttons and rings are removed, to be put in place again after the wash. When the major's coat was returned from the new laundry the eyelets had been carefully sewed up and a bright brass button had been sewed firmly over each. Also the seams of the major's riding breeches, which open from just above the knees to just below, to admit of adjustment over the knees, had been sewed up so tightly that it took the major's wife half a day to rip them. The earnest and conscientious laundress thereupon received a course of special instruction pertaining to the requirements of the U. S. A.

FINE LINEN 6,000 YEARS OLD

Fruits of the Looms of Ancient Times Have Defied the Passing of the Centuries.

In one of the apartments at University college, London, Professor Flinders Petrie has placed on exhibition some remarkably interesting antiquities unearthed at Tarkhan, Heliopolis and Memphis under the auspices of the British School of Archaeology in Egypt.

The great cemetery of Tarkhan, which occupied a mile of desert 40 miles south of Cairo and which dates from the earliest historic age until the race of the pyramid builders, has proved to be exceedingly prolific in antiquities.

What has struck Professor Petrie is the extraordinary preservation of the woodwork and clothing unearthed from these places of interment of long ago.

A great sheet of linen which is placed on exhibition is as fresh and as firm as when cut from the original length—and it is some 6,000 years old. So, likewise, with the woodwork, which, in but few instances, shows signs of decay. Here are boxes that serve their purpose as funeral caskets, built of planks of acacia and shittim wood, and as firm and secure as when lowered into the bosom of the earth in dim antiquity.

Milk Saved the Auto.

A farmer named Richter, of Millwood, in Westchester county, N. Y., sacrificed a load of milk the other day to save a new touring car, in which two women were riding, from being destroyed by fire. The engine of the car began to spit flames. Finally it took fire. The occupants then abandoned it for fear the gasoline tank might explode. Richter came driving along with several cans of milk. With him was his eighteen-year-old son. He alighted from the wagon, and seizing a ten-quart can filled with milk threw the contents over the flames. The floor of the car was afire and burning briskly. He saw he would have to waste several more cans of milk to save the auto. "Come, hand me those cans quickly," he said to his son. He emptied them over the auto as fast as he could. The flames were checked, but not until nearly one hundred and fifty quarts of milk had been sacrificed. The owner of the car asked him what the milk was worth. Richter fixed his loss at seven dollars, but the lady gave him twenty-five dollars, saying, "You deserve all this, if not more."

How Hot Is Lava?

To ascertain the temperature of lava as it is emitted from a volcano has baffled many scientists. The Roman academy has just published the results of the investigations made by Giovanni Platania during the eruption of Etna last year.

The eruption began September 10 and the scientist was unable to approach the mountain for ten days, when one crater was still in action. He camped as near as he could to this crater, close to a stream of lava flowing about a yard a second.

Using the new "telescope pyrometer," he got temperatures for the surface of the lava flow of all the way from 1,040 to 1,420 degrees.

A second series of observations, taken at a distance of a dozen feet, gave figures as high as 1,500 degrees. The estimates are that the incandescent lava, as it comes directly from the crater, has a temperature not less than 2,200 degrees.

Unforeseen Complication.

Jimson, in London, had rung up a well known shop in Paris by telephone to communicate an order on behalf of Mrs. Jimson. After waiting two hours for the connection to be made, he entered the booth and began. Two minutes later he emerged.

"Say, mister," said he to the attendant, "can't you put me on a wire that'll translate what I have to say in to French? I can't make that darned jackass on the other end of the line understand a word I say.—Harper's Weekly.

Sweet Charity.
"Has it ever occurred to you that the more money a man has the more difficult it is for him to be charitable? When one is poor and has only a few cents it is an easy matter to divide the money with some poor devil who has none."

Eagle Not Always Brave.
Eagles are generally believed to be very courageous. That they are not always as brave as is supposed is proved by the following anecdote: A naturalist tells of a combat between ten missile-thrushes and a white-tailed eagle, in which the latter was thoroughly vanquished, and was discovered squatting down in a shed, where he had been driven in hope of refuge from the angry birds.

You Want the Best—
Not the Cheapest
Flanders "20" Roadster, \$750
Don't be alarmed if somebody tells you you can buy an automobile for less money than the \$750 Studebaker-Flanders "20." You can, but you better not. The Flanders "20" corresponds point by point with the best and highest priced cars sold. Cheaper cars at every vital point are built on ideas long ago discarded for good cars. Don't take our word for it. Make comparisons and see.
The Studebaker-Flanders "20" is a marvel—a high grade modern car at a low price. If you pay less you buy much less. And the cheaper car today will cost you far more in the long run. The competing car isn't sold which the Studebaker Corporation, the greatest automobile manufacturers in the world, couldn't reproduce for less money; but we won't build a cheap car, because the name "Studebaker" means the best for your money.
If you are content with a car that runs today and dies tomorrow, don't buy the \$750 Flanders "20." It will wear for years. Remember this—the Studebaker-Flanders "20" will outwear 2 to 1 any other car under \$1100 and give you double satisfaction, confidence and comfort into the bargain.
We can prove it—Send for new catalogue

Orphans Defeat Paris.

In the game at Mt. Sterling yesterday Paris was defeated by a score of 7 to 3.

FRIDAY.

In a listless game at White Park Friday afternoon Paris was defeated by Lexington by a score of 10 to 4. Hauser, who was on the mound for Paris, was very ineffective, and the visitors connected with his curves for fourteen clean hits. While Turner was hit for eleven he managed to keep them sufficiently scattered to be of little benefit.

SATURDAY.

Paris and Mt. Sterling met Saturday, resulting in a victory for the Bourbonites by a score of 9 to 5. The visitors could do but little with Dunlap, who held them to five hits, two of which came in the last inning. The locals drove Funk from the mound in the second inning, and he was succeeded by Knight. Shook featured with the bat, getting three hits out of four trips to the plate, two doubles and a single.

SUNDAY.

The masterly pitching of Friedley was too much for Paris Sunday afternoon, and the Orphans took the final game of the series by score of 3 to 1. Perkins, a recruit, was sent to the mound and started the game, but before the side had been retired he was relieved by Hauser. The visitors took advantage of every opportunity and sewed up the contest in the first inning. The locals fielded a perfect game but could not connect with Friedley. Their only run was the result of pass and two errors.

Subscriptions to Repair Roads.

An enthusiastic meeting was held at Sharpshurg last week for the purpose of devising ways and means for repairing the Maysville and Mt. Sterling unpike from that city south to Hinkston bridge, a distance of about three miles. About \$1,800 was raised by subscription and about fifteen farmers have promised their wagons, teams and hands for ten days' work on the road. It is to be superintended by citizens who are not to charge for their services.

Tuberculosis Commission Organized.

The State Tuberculosis Commission met Friday afternoon with Gov. McCreary, who was unanimously elected President, and Mrs. Desha Breckinridge Vice President. The Capital Trust Company was chosen as Treasurer of the fund, but no Secretary was elected. The Secretary will be in charge of the commission's headquarters in the Capitol, and it was deemed advisable to defer action for the present. By-laws were adopted. The work of the commission will be done through committees, of which five were named—Executive, Finance, Publication, Legislation and Extension. The by-laws provide for bi-monthly meetings.

Representative in Paris.

Thomas Y. Witherspoon, Jr., of Cincinnati, O., representing the Associated Publishers' Company, arrived in Paris Saturday to interest the leading business men and merchants of this community in the company.

The Associated Publishers' Company is a combination of the leading newspapers in the county seats of Kentucky, who will issue a monthly magazine supplement with their papers. The company will embrace other States, and gives excellent promise of becoming one of the leading publishing concerns in the country. Numerous representative citizens of this community have already become financially interested in the enterprise, and as only a limited number of shares of the company can be sold in Bourbon county, the length of Mr. Witherspoon's stay in Paris is problematical.

School Per Capita \$4.05.

The school per capita to be paid by the State of Bourbon county for the ensuing year will be \$4.05; Fayette \$4.01; Clark \$4.03; Jassamine \$4.02 and Woodford \$4.04.

The difference in the per capita is caused by the difference in the dog tax collected in each county and the difference in the amount on interest due on bonds to the various counties, heretofore issued to the counties or school money due to them.

Narrowly Escaped Serious Injury.

A peculiar accident to an automobile tire which occurred yesterday afternoon caused considerable excitement on Main street and endangered the life of Miss Mayme Neal, bookkeeper in the department store of Mr. Harry Simon.

The automobile of Mr. Sidney G. Clay was being driven down the street and at a point in front of J. T. Hinton's store one of the rear tires blew out. The force of the escaping air dislodged the rim of the wheel, hurling it on the pavement with great force and striking Miss Neal, who was passing.

The iron rim tore her dress skirt in several places but she escaped without injury, which is regarded as miraculous. Had the car been on a higher elevation the accident would probably have had a serious result.
